

# Architectural Aluminum & Framing

ITI Glass offers a complete line of architectural aluminum and framing, including — storefront, curtain wall and entrances. Purchase aluminum and framing from ITI Glass in stock lengths, custom cut-sizes, or pre-assembled in a complete package with fabricated glass.

## Storefront Framing

**T14000 Series** is a thermally improved center-set glass storefront framing system used in low-rise exterior applications.

The product allows for inside or outside glazing and is assembled using screw spline or clip joinery. Extra-

heavy intermediate verticals also available for better performance against strong wind loads.

**4500 Series** is a center-set glass storefront framing system used in interior and low-rise applications. Glazed from the outside, the product features roll-in gasket installation, and like T14000, can be assembled using screw spline or clip joinery.

## Standard Entrances

Standard entrances are designed for commercial and retail applications and come with 2-1/8-inch narrow, 4-inch medium, and 5-inch wide stiles and top rails. Standard doors are constructed using a durable tie-rod assembly that can be modified in the field. Standard doors are compatible with T14000 and 4500 Series storefront framing, and 400 and 200 Series curtain wall framing.

With a superior extruded aluminum finish that is preferred by architects and building designers, ITI Glass supplies a complete line of architectural aluminum and framing.

- Storefronts and Curtain Walls
- Entrances
- Windows and Frames
- Sunshades

## Curtain Wall Framing

**400 Series** is a structurally improved curtain wall framing system that reduces the need for steel reinforcing in mid-rise and high performance storefront applications. It is glazed using an exterior screw-applied pressure bar with snap-on covers. Silicone verticals also available for a seamless appearance.

**200 Series** is an economical curtain wall framing system used in low- to mid-rise applications and high performance storefronts. Like 400 Series, the product is glazed using an exterior screw-applied pressure bar with snap-on covers.

## Product Specifications

Product	Face Width (inches)	Backmember Depths (inches)	Face Depths (inches)	Overall Depths (inches)	Glass Thickness (inches)	U-Value
T14000 Series Storefront	2, 4-1/2	--	--	4-1/2	1	0.60
4500 Series Storefront	1-3/4	--	--	4-1/2	3/16, 7/32, 1/4, 5/16, 3/8	--
400 Series Curtain Wall	2-1/2	3-5/8, 4, 5, 5-1/2, 6, 7, 8	5/8, 3/4, 1, 1-1/2, 2, 2-1/2	5-1/2 to 11-3/4	1	0.67
